PROFESSIONAL SUMMARY

Creative and detail-oriented UI/UX Designer and Frontend Developer with proven hands-on experience designing intuitive user interfaces for web and mobile platforms. Specialise in end-to-end user experience design — from user research, usability testing, and data-driven design decisions through to high-fidelity prototyping, design systems, and frontend implementation. Proficient with industry-standard design tools including Figma and Adobe XD. Currently serving as Design Lead on Project Butterfly, a purpose-driven relationship platform, where I own the full UX strategy, visual identity, and industrial design language. Trained in software engineering at Refactory Academy, Kampala. Strong communicator and collaborative team member. Passionate about building user experiences that are both beautiful and deeply functional. Available immediately and based in Kampala, Uganda.

DESIGN & TECHNICAL SKILLS

UI/UX Design	Industrial Design Language & Branding
User Experience (UX) Strategy	User Research & Persona Development
User Interfaces (UI) Design	Human-Centered Design
Usability Testing	HTML / CSS / JavaScript
Data-Driven Design	React (learning)
Figma	Node.js & MongoDB
Adobe XD	Computer Science Fundamentals
Design Tools (Figma, Adobe XD, Visily)	Typography & Color Theory
Wireframing & Prototyping	Agile / Lean Methodology
Responsive & Mobile-First Design	Collaboration & Cross-Functional Teamwork
Design Systems	Communication (Written & Verbal)

PROFESSIONAL EXPERIENCE

Design Lead & Frontend Developer

Jan 2025 – Present

Project Butterfly — Ijeoma Limited®

Purpose-driven, marriage-focused relationship platform for adults aged 30–60+, built around compatibility algorithms, emotional intelligence tools, and verified user profiles.

- Directed end-to-end user experience design — conducting user research, defining user flows, building wireframes, running usability testing sessions, and managing the full design system — reducing design iteration cycles by 30%.
- Applied data-driven design principles: analysed usability test findings and user feedback to inform every major interface decision, improving prototype task-completion rates by 35%.
- Designed all user interfaces across 10+ screens including a 6-step relationship journey, compatibility quiz UI, verified profile badges, and premium subscription flows — directly using industry design tools Figma and Adobe XD.
- Established the full industrial design language and visual identity: branding, color systems, typography, and marketing graphics, creating a cohesive brand used across all product touchpoints.
- Translated high-fidelity Figma designs into functional, responsive frontend interfaces using HTML, CSS, and JavaScript — cutting designer-to-developer handoff time by 40%.
- Led a cross-functional team of 3+ members, communicating design rationale clearly and collaborating closely with developers and stakeholders throughout the Agile product lifecycle.

UI/UX Designer & Frontend Developer

Mar 2025 – Jun 2025

My Grocery Buddy

Full-stack grocery management web application helping users track, plan, and shop smarter.

- Conducted structured user research including interviews and surveys; created 3 detailed personas that directly informed 12+ UI/UX design decisions and shaped the entire user experience architecture.
- Planned and executed usability testing with 10+ participants, identifying and resolving 8 critical pain points before development — reducing post-launch defects by 25%.
- Delivered data-driven design iterations: analysed usability test results and updated user interfaces in two successive rounds, raising the System Usability Scale (SUS) score from 68 to 84.
- Designed full UI in a deep green glassmorphism visual style using Figma and Visily as primary design tools; developed live budget tracker, category-grouped lists, and PDF export features.
- Built responsive frontend with HTML, CSS, and JavaScript and backend with Node.js and MongoDB, delivering a fully functional MVP in 6 weeks.
- Documented a comprehensive UI/UX case study covering the full design process from research to deployment.

UI/UX Designer

Feb 2025 – Apr 2025

Mayondo Wood and Furniture

- Designed a clean, product-forward user interface showcasing a 50+ item catalogue; improved information architecture and visual hierarchy to boost projected product discoverability.
- Conducted competitive analysis and created wireframes in Figma; delivered fully responsive prototypes tested and optimised across mobile, tablet, and desktop viewports.

UI/UX Portfolio Website

2025 – Present

Personal Project

- Designing and coding a personal portfolio from scratch, featuring in-depth case studies for Grocery Buddy, Mayondo, and Project Butterfly — demonstrating both design thinking and frontend development capability.

EDUCATION

Certificate — Software Engineering, Frontend Developer

Jun 2025 – Present

Refactory Academy, Kampala

- Completed 240-hour certification in human-centered design, application development, and UI/UX principles.
- Trained in design thinking, usability testing methodologies, and frontend implementation using JavaScript.
- Collaborated in Agile and Lean team environments on real-world project deliverables.

Uganda Advanced Certificate of Education (A-Level)

Feb 2023 – Nov 2024

Buddo Secondary School, Kampala

- Subjects: History (A), Entrepreneurship (B), Literature in English (B).

CERTIFICATES & TRAINING

- Certificate of Software Engineering in JavaScript — Refactory Academy (Jun 2025)
- Employability Skills Certificate — BrighterMonday Uganda (Nov 2025)
