PROFESSIONAL SUMMARY

I am a UI/UX Designer and Frontend Developer who enjoys building digital products that feel good to use. I work across the full design process, from early user research and wireframing through to high-fidelity prototyping and frontend implementation. I am comfortable in Figma and Adobe XD and have experience turning designs into real, working interfaces. I am currently the Design Lead on a purpose-driven relationship platform where I work closely with a team of six. I trained at Refactory Academy in Kampala and I am available to start immediately.

DESIGN & TECHNICAL SKILLS

- UI/UX Design and UX Strategy
 - Figma, Adobe XD and Visily
 - Wireframing and Prototyping
 - Usability Testing and User Research
 - Design Systems and Visual Identity
- HTML, CSS and JavaScript
 - React (learning), Node.js and MongoDB
 - Responsive and Mobile First Design
 - Human Centered Design
 - Agile and Lean Methodology

PROFESSIONAL EXPERIENCE

Design Lead & Frontend Developer

Relationship Platform, Ijeoma Limited

Jan 2025 – Present

A purpose-driven relationship platform for adults built around compatibility algorithms, emotional intelligence tools and verified profiles.

- Worked as part of a cross-functional team of six to design and ship the full product experience, contributing to user research, user flows, wireframes, usability testing and the design system.
- Used usability findings and user feedback to guide design decisions, which helped improve prototype task completion rates by 35% and cut iteration cycles by 30%.
- Designed over 10 key screens including a 6-step relationship journey, a compatibility quiz, verified profile badges and premium subscription flows using Figma and Adobe XD.
- Helped establish the visual identity of the product including the colour system, typography and marketing graphics used across all touchpoints.
- Turned high-fidelity designs into working, responsive frontend interfaces using HTML, CSS and JavaScript.

UI/UX Designer & Frontend Developer

My Grocery Buddy

Mar 2025 – Jun 2025

A full-stack grocery management web app that helps users track, plan and shop more efficiently.

- Ran user interviews and surveys, built 3 personas and used them to shape 12 or more design decisions. Usability testing with 10 participants surfaced 8 key issues before any code was written.
- Iterated on the design twice based on test results and pushed the System Usability Scale score from 68 to 84.
- Designed the full UI in a glassmorphism style using Figma, then built the frontend and backend using Node.js and MongoDB, delivering a working MVP in six weeks.

UI/UX Designer

Mayondo Wood and Furniture

Feb 2025 – Apr 2025

- Designed a clean interface for a catalogue of over 50 products, improving how items were organised and making them easier to discover.
- Delivered responsive Figma prototypes that were tested and refined across mobile, tablet and desktop.

UI/UX Portfolio Website

Personal Project

2025 – Present

- Building and coding my own portfolio from scratch, with full case studies covering all three projects above.

EDUCATION

Certificate in Software Engineering, Frontend Developer

Refactory Academy, Kampala

Completed Jun 2025

- Completed a 240-hour programme covering human centered design, application development and UI/UX principles.
- Gained hands-on experience in design thinking, usability testing and frontend development while working in Agile team settings.

Uganda Advanced Certificate of Education (A Level)

Buddo Secondary School, Kampala

Feb 2023 – Nov 2024

- Subjects: History (A), Entrepreneurship (B), Literature in English (B).
